

Angle Steel Lattice Monitoring Tower 10-50m Lookout Watchtower

Mao Tong is a professional China Angle Steel Lattice Monitoring Tower 10-50m Lookout Watchtower manufacturers and suppliers, if you are looking for the best Angle Steel Lattice Monitoring Tower 10-50m Lookout Watchtower with low price, consult us now! The advantages of monitoring tower covers a small area, saves land resources, convenient installation and

transportation.

Product Description

Mao Tong is Angle Steel Lattice Monitoring Tower 10-50m Lookout Watchtower manufacturers and suppliers in China who can wholesale Angle Steel Lattice Monitoring Tower 10-50m Lookout Watchtower. Qingdao Maotong electric power equipment Co., Ltd. is specialized in producing all kinds of steel tower, mainly product Angle Steel Lattice Monitoring Tower 10-50m Lookout Watchtower, angle steel tower, monopole tower, communication tower, training tower, steel tower mast and all kinds of steel structure products. Our products have good price and good reputation all the time from abroad European and American Southeast Asia and Africa.

Watchtower monitoring is to observe the occurrence of forest fires through the watchtower, determine the location of the fire, and report the fire. Rangers regularly board the observation tower to observe the presence of fire and the spread of forest fires in a 360° view without blind spots. As long as the number and location of the observation towers are reasonable, a small number of observation towers can completely monitor the forest area. The main advantage of the Angle Steel Lattice Monitoring Tower 10-50m Lookout Watchtower is its larger coverage and better effect.

Monitoring towers are generally between 10m and 50m high. The most common is around 20m.

The surveillance tower is based on the communication tower evolved. So as to realize the function of monitoring, the function of monitoring tower is mainly to install cameras remote cameras. The main body of the Angle Steel Lattice Monitoring Tower 10-50m Lookout Watchtower is generally welded with a combination of Angle steel tubes and presented as silver.

The protection ability is 30 years to 50 years wind resistance ability reaches 12 levels, more than 30m per second. In general, the application scenario is grassland, forest and the edge of the factory area.

The advantages of monitoring tower covers a small area, saves land resources, convenient installation and transportation.
